

ARIZONA SOLAR COMPANIES

Arizona is poised to become the nation's solar energy capital. More than 100 established solar companies operate in the state providing a range of services including manufacturing, design, installation, distribution, etc. Arizona is anchored by world-class companies such as:

Albisa Solar

Plans to build a 200-megawatt solar plant in Northern Arizona.

Abengoa

Is contracted to build one of the world's largest solar plant in Arizona.

Advent Solar

In a development partnership with Arizona State University (ASU) to further the advancement of solar photovoltaic technology.

American Solar Electric

Arizona-based residential, industrial and commercial solar electric power systems and engineering and contracting firm.

Ausra

Designs, manufacturers, installs and operates solar thermal energy systems for customers around the world.

BrightSourceEnergy

Develops, builds, owns and operates large scale solar plants.

CentroSolar

Photovoltaics business focusing on roof-mounted systems.

Colexon

Project developer of large-scale photovoltaic systems.

EnviroMission

Developer of Solar Tower clean green renewable energy power stations.

First Solar

Manufacturer of PV modules designed for large scale, grid-connected solar power plants with headquarters in Tempe.

Global Solar

Producer of thin-film photovoltaic CIGS solar cells.

Kyocera

Vertically-integrated producers and suppliers of solar energy products with American headquarters in Scottsdale.

Nanovoltaix Inc.

Manufacturer of capital equipment for the solar energy industry.

REC Solar

Installs or integrates solar panels into homes and businesses.

Schletter Inc.

Manufacturer and distributor of solar mounting systems.

SolarCity

A national leader in solar power system design, financing, installation, monitoring and related services.

SolFocus

Developer of concentrator photovoltaic systems that has a solar glass reflector manufacturing factory in Mesa.

Solon SE

Supplier of photovoltaic systems for large-scale solar power plants with manufacturing operations in Tucson.

Standard Renewable Energy

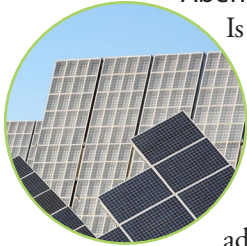

Provides energy efficiency and renewable energy solutions for homes and businesses.

Stirling Energy Systems (SES)

With headquarters in Scottsdale, SES is a global leader in the utility scale solar electricity market.

TÜV Rheinland PTL

Based in Tempe and in a unique partnership with ASU, TÜV is the first in the world to offer full-scale PV testing and certification across the entire component chain of photovoltaic systems.
